6. Ensure that both boxes are checked when asking for access, then click on Allow Access.

7. You then will be taken to John Deeres website that will allow you to save Kinze Blue Connect as an Organization Connected as show below

8. You can confirm connection is complete by looking at your Blue Connect Log in page and confirm there is a green check and process is complete

Data Transfer:

John Deere Operations Center Application Connection

- Send planting and application data from Blue Vantage displays through Blue Connect accounts to JDOC accounts utilizing Blue Vantage WIFI by simply logging into your JDOC account in Blue Connect
- Requires a Kinze Blue Connect account and a JDOC account
- Eliminates need for exporting Blue Vantage tasks to USB for import to FMIS
- Data is transferred at the top of every hour directly into your JDOC Account
