## Enhancements

Firmware: 8.08.00.0837

### Fertilizer:

- **New:** 5900 Fertilizer Support for Dual Product diaphragm pump fertilizer system
  - Supports a rate range of 2-25 GPA
  - Supports speeds from 3-12 MPH
  - Support Row Fertilizer flow switch
- **New:** Single Tank Level Sensing
  - Ability to see the Fertilizer tank level in single tank applications
  - Show acres to empty based on the rate with single tank applications

### 5670

- **New:** True Speed Meter Support

### Singulation by Product

- **New:** When planting split hybrids, singulation, skips, and doubles will be shown for each hybrid. (Figure 3)

### Section Off Reminders

- **New:** When manually turning off sections, an audible alert will sound every 5 seconds to remind you that the section is turned off (Figure 4)

### Widget Adjustments

- **New:** Ability to change widgets from split screen mode (Figure 5)
- **New:** Ability to easily change widgets in a slot by simply selecting them (Figure 6)
- **New:** New fertilizer widget to allow display of rail pressure, rate, and tank level (if equipped with tank level sensing)

### Product Required for RX

- **New:** Show lbs. of seed or gallons of fert needed per RX (Figure 7 )

### Map Previews in Task Listing

- **New:** Ability to see a preview of the Map for Boundary or Seed Rx
  - Shows a preview of the map and shows the crop type

## Duplicate Task Notification

- **New:** Notification to help reduce duplicate field names. (Figure 8)

## Map Scouting

- **New:** Ability to take tablet out of tractor cab for field scouting (Figure 9)
  - Function is automatically turned on
  - Backwards compatible with older generation tablets
  - Utilize the locate button on the screen for your location

## Language Support

- **New:** Supports the Czech language

## Screen Shots

- **New:** Ability to add notes and draw on a screenshot

## Blue Connect Support

- **New:** Improved Blue Connect Account Syncing (See Chart Below)
  - Send planting and application data from Blue Vantage displays through a Blue Connect account to Ag Leader AgFiniti and JDOC
  - Ability to sync Grower, Farm, and Field from JDOC and Case IH Field Ops
    - Figure 1
  - Ability to upload Boundaries and RX Files from the web-based Blue Connect page
    - Figure 2
