ROW UNITS

5000 SERIES

The family of **Kinze 5000 Series electric drive row units** are sleek-styled cast row units that are not just for good looks. Purposefully designed front-to-back for high-productivity planting, they arrive packed with standard features that boost productivity and minimize daily maintenance. A full array of options completes the 5000 Series row units to satisfy the unique requirements of your farm. **Exclusively offered on the 5670 pivot fold planter, is the all-cast 5000 Series push split row unit.**

Row unit operation is integrated with the Blue Vantage display

Coulters, residue wheels, or Yetter air-adjustable row cleaners

True Speed high speed electric or True Rate vacuum electric meters

Granular chemical boxes available for insecticide application

Greaseless and shim-less pivot arms
outfitted with robust arm pockets

True Depth hydraulic down force
ensures ideal consistent seed depth

Dedicated storage
under the lid for seed and vacuum tube plugs

12" vertical travel
ensures ideal seed depth in rolling terrain

Manual meter run button
enables reloading of seed disc after inspection

Large cast parallel arms
equipped with double bushings for long life

Shim-less pivot arms
are accurate, quick, and easy to adjust

Disc opener with double-row bearings
for increased service life

Quick lock-up closing wheels
for easy inspection of planted seed

Air-adjustable closing wheels (optional)
for optimum seed-to-soil contact

Greaseless fiber bushings
used with larger gauge wheel pivot arms for long life

Swivel quick-disconnect
for effortless removal of seed hose

Spoked gauge wheels
equipped with heavy-duty, long-life steel scrapers

Spring loaded hardened disc scraper
hardened material for double the service life

Cast closing wheel arm
provides added durability

BLUE VANTAGE

Simple. Accurate. Intuitive.

Blue Vantage® is the industry's easiest-to-use dedicated planter display. Designed by Kinze and exclusive to Kinze planters, this innovative, clean, and streamlined display provides simple, accurate, and intuitive planter control for high-productivity planting. Factory presets remove the labor and guesswork from setup, while a dedicated planting screen provides all critical information at one glance during planting. Built-in diagnostics provide easy and efficient troubleshooting. The Kinze 5900, 5700, and 5670 planters exclusively use the Blue Vantage display and Blue Drive electric drive.

- Only 3 clicks are required to start planting with the rugged and simple-to-use touch-screen
- A single screen displays all critical information, and factory presets eliminate setup guesswork
- Yetter air adjust row cleaners are fully controlled from a dedicated display screen
- See clearly behind the planter with the standard rear-facing camera; 3 additional cameras are optional
- Remote viewing of the Blue Vantage screen when logged into a Blue Connect account
- Adjust prescription map populations after importing them – directly from the plant screen
- The Blue Connect data solution has no unlock codes and you, the farmer, always own the data

Shutoffs:
Tap for manual shutoffs and toggle automatic shutoffs

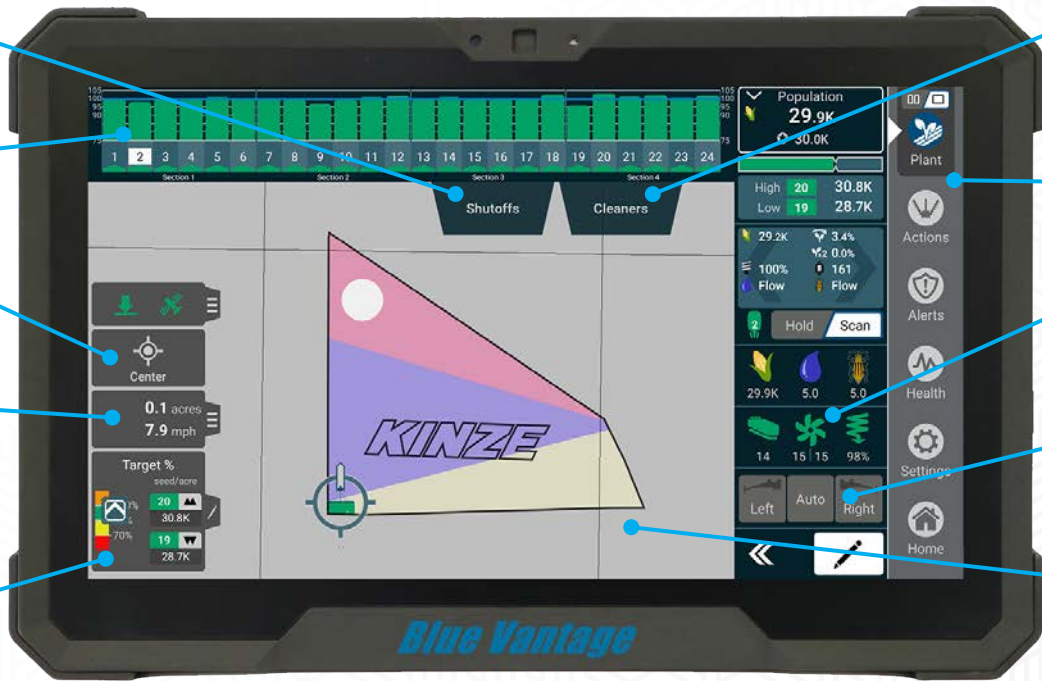

Row-by-Row Graph:
Includes population, singulation, and down force information

Center / Field Zoom:
Toggle between full-field or tractor-centered zoom levels

Acres & Speed:
Displays acres planted during current session, current task, current speed, bulk fill scale & Blue Connect information

Data Layer Legend:
Displays legend for planter swath and adjustable bar graph

Plant Screen

Row Cleaners:
Tap to toggle for pneumatic row cleaner information & control

Navigation Bar:
For easy display navigation

Pressures:
Monitor and adjust fan pressure and down force settings

Side Bar:
Customizable side bar displays most used information

Touch Screen:
With pinch zoom control

Shared Mapping (Map Sync®)

Split Screens

All plant screen map layers can be viewed in single- or split-screen mode and enable you to monitor two planting maps at the same time. A simple touch of the PLANT icon toggles the screen between modes.

BLUE CONNECT

A remote cloud-based data storage solution for planting and field data.

- Blue Connect and the Blue Vantage display exchange data whenever Blue Vantage has a customer-supplied internet connection and is signed into a free Blue Connect account.
- No unlock codes are required since it is included with the Blue Vantage display - and the farmer always owns the data.
- Enables remote viewing of the display by customers and dealers, and performing wireless software updates. Setting up a Blue Connect account is fast, easy, and completed right from the display.
- The shared mapping feature Map Sync® enables two or more planters equipped with Blue Vantage displays to share planting coverage data in the same field at the same time.
- Enables sharing of logged data with John Deere Operations Center™ and Ag Leader AgFiniti®

Climate FieldView

Add a **FieldView™ Drive adapter kit** and an iPad, and the Cab App to upload data to your FieldView account. Check for compatibility at support.climate.com.

5000 Series

BLUE DRIVE TRUE Confidence.

Blue Drive® is a Kinze designed electric drive system that is simple, reliable and accurate, giving you confidence during the planting season. The industry-exclusive design is used throughout the planter and delivers enhanced section control and accurate seed placement, ensuring maximized profitability.

PATENTED
Ethernet
technology

- **Ethernet connectivity provides reliable, faster connection** and speeds for quick software updates and troubleshooting
- **Designed to be easily updated with software upgrades** and additional features that require no costly unlock codes.
- **Kinze Blue Drive electric drive equipped planters** are covered by an industry leading **2-year hitch pin to closing wheel warranty**

5000 Series

TRUE SPEED

Accurately achieve results at TRUE higher speeds.

Accurately plant at speeds from 3–12 mph with the **True Speed®** high speed meter and plant up to twice the number of acres in a day versus a conventional meter.* By controlling the seed from the seed disc to placement in the seed trench, precise singulation and seed spacing are achieved regardless of seed size, shape, or coating. Industry leading low seed release point delivers superior spacing accuracy for precise seed positioning in the row.

*Subject to equipment, seed type and field conditions

- Easily replaceable industry leading wear components are long life and low cost — saving time and money
- A single, no-adjust singulator is all that is needed for planting corn, sugar beets, milo, cotton, and oil sunflowers
- Self-aligning delivery tube flighted belt does not stretch, or require removal after the planting season
- All access to the meter and delivery tube are tool-less for easy and efficient crop change-overs and maintenance
- Quick changeover of seed type is aided by a pivoting meter mount with lock-up, and easy to remove seed discs

True Speed high speed meter seed discs

Wheat/barley
210 Cells
(PN G11551X)

Accuracy at your speed to maximize field efficiency and planting performance at speeds from 3-12 mph.

	5 mph	7 mph	10 mph	12 mph
Acres/hour (24 row planter)	26 acres/hr	36 acres/hr	51 acres/hr	61 acres/hr
Acres/hour (16 row planter)	17 acres/hr	24 acres/hr	34 acres/hr	41 acres/hr
% efficiency increase	-----	29%	50%	60%

No adjust singulator
One singulator for all crop types requires no adjustment

Unique meter orientation
Perpendicular meter orientation provides seamless seed handoff from disc to delivery tube

Unique seed disc paddle design
Provides positive load-in and holds the seed for precise handoff to delivery belt

Kevlar reinforced belt
Wear components designed for long life and lower cost of ownership. Seed delivery belt has 1,500+ row acres of wear life per row and removal is not required at end of season.

Lowest release points in the industry
For superior Coefficient of Variation (COV)

Brush wheel

- Keeps seed in control with a positive handoff from the seed disc to the delivery belt
- Longer life and low cost replacement provides lower cost of ownership

TRUE RATE VACUUM METER

Accurately plant a variety of seeds at a TRUE metered rate.

The **True Rate**® vacuum meter, with its wide selection of easy-to-change seed discs, is the most versatile and accurate seed meter for planting many types of seed, at speeds up to 8 mph*. The durable and easily serviceable design requires only one singulator for easy operation, optimum performance, and low cost of ownership.

*As field conditions allow

- **Consistent seed drop** from the 3 o'clock position regardless of planter speed or population
- **Singulation accuracy** is easy to maintain using just one easily adjusted singulator
- **Vacuum levels remain constant** with an engineered long-life polymer seal
- **Improved COV, especially on slopes**, from tapered edge seed disc design
- **Quick crop changeover** facilitated by simple removal of meter cover and seed disc

True Rate vacuum meter seed discs

Many color-coded seed discs are available for planting different crops, seed sizes, and populations.

Easy adjust singulation

One adjustable seed singulator for all seed types and sizes

Long lasting seal

Made from thermoplastic silicone

Superior loading

- Seed pool shape promotes 100% clean out
- Seed channel ensures every seed cell is loaded, preventing skips

5000 Series

TRUE DEPTH

HYDRAULIC DOWN FORCE

Automatically hit your TRUE target depth to increase yields.

True Depth® hydraulic down force removes the guesswork from down force settings. It maintains a consistent seed depth for optimum emergence and root development along with minimizing sidewall compaction. During conventional or no-till planting, gauge wheel load is constantly measured, and automatically and instantly adjusts for up to 650 lbs. of down force, or 150 lbs. of up-lift, for individual rows. A large diameter hydraulic cylinder rod and cast load link make True Depth more durable than competitive systems and maintain a low cost of ownership.

- **Confidently handle challenging conditions** using the large-diameter hydraulic cylinder rod
- **Cost of ownership is lowered** due to cylinders that can be easily rebuilt
- **Long wear from durable cast load link** with fully potted and sealed electronics
- Operation is simple and **maintenance is kept low with a single valve-per-row design**
- **Simple system operation** is integrated into the Blue Vantage display
- **Provides lift assist** to aid in raising push row units into locked position

True Depth display

- True Depth map showing applied force as planted
- True Depth controls are integrated into the Blue Vantage display

5000 Series

Liquid Fertilizer

The Kinze 5900, 5700, and 5670 planters are available with a time-saving liquid fertilizer system with 300 to 750 gallons of onboard capacity. Equipped with a durable and long-life diaphragm-style pump, it is easily capable of drawing fertilizer from saddle tanks or an auxiliary nurse tank. The high accuracy control valve enables applying fertilizer at rates from 2–25 GPA, and individual row shut-offs are controlled by the Blue Vantage display.

- 5670 features automatic tank leveling to maintain equal fertilizer levels in each tank on hillsides
- Optional plumbing for connecting to saddle tanks or a nurse tank is factory-installed
- No pump seal damage if the diaphragm pump is accidentally allowed to run dry
- Low maintenance row-by-row flow switch

Fertilizer availability			
Model	Configuration	Tank Capacity	Opener Availability
5900	24R30 w/o openers	750 gal.	No
	24R30 w/ openers	500 gal.	Yes
	16R30	500 gal.	Yes
	12R30	400 gal.	Yes
5700	36R20	750 gal.	No
	24R30	750 gal.	No
	24R20	500 gal.	No
5670	31R15	300 gal.	Yes
	23R15	300 gal.	Yes
	16R30	600 gal.	Yes
	12R30	600 gal.	Yes

Fertilizer pump and control valve

Diaphragm-style pump, along with a high accuracy enables application rates at low to high speeds.

Fertilizer flow switch

Easily indicates fertilizer flow at all application rates and is integrated with the Blue Vantage display. Resistant to tacky fertilizer, easy to clean, and available for retrofit of older flow switches.

Fertilizer openers

Single disc notched fertilizer openers that support no-till practices are available on the 5900 and 5670 planter models. Gauge wheels are standard on the 5900.

5900 shown

5670 shown

Fertilizer drop tube

Deliver fertilizer right where it is needed and maximize your investment with drop tubes installed in-furrow behind the seed tube or **NEW** behind the closing wheels.

Automatic Tank Leveling

Exclusive to the Kinze 5670 is **automatic tank leveling** that maintains equal fertilizer levels in each tank while planting on slopes and prevents overflowing of the downhill tank. Sensors in each tank work with the Blue Vantage display to direct the flow of fertilizer and maintain equal tank levels.

NEW Dual-Product Fertilizer System

NEW for MY2026 is the dual-product fertilizer option – available on all 5900 front fold planter configurations. This option feature enables two different fertilizer products to be applied at the same time while planting – one drawn from the onboard fertilizer tank and the other from saddle tanks or drawn nurse tank. Fertilizer can be applied using a combination of fertilizer openers, in-furrow drop tubes, rear drop tubes, or other preferred methods.

- Two separate diaphragm-style pumps and control valves for two different application rates from 2-25 GPA
- Individual row shut-offs are easily controlled by the Blue Vantage display
- Includes necessary plumbing for a seamless connection to the auxiliary fertilizer tank

5000 Series

Granular Chemical

Complete planting, fertilizer, AND insecticide application in one pass. Use prescription maps or directly control the application rates with the Blue Vantage display without getting out of the tractor cab.

5000 Series

Row Cleaners

The Kinze 5900, 5700, and 5670 high-tech planters are available with factory-installed **Yetter 2940 Air Adjust™ Series row cleaners**. Easily change row air settings and operating depth for optimum residue control from the dedicated Blue Vantage row cleaner screen. Both parallel linkage row cleaners are equipped with up and down airbags to precisely follow ground contours and clear a path for an ideal seedbed.

An air adjust-only control package is available for connecting to other makes of air-adjustable row cleaners. They are also controlled by the Blue Vantage display just like the Yetter row cleaners

**Yetter 2940
Air Adjust™
Row Cleaner**

**Yetter 2940
Air Adjust™
Coulters & Row
Cleaner Combo**

5000 SERIES ROW UNIT ATTACHMENTS

Coulters mounted residue wheels with treader wheel

No-till coulters with or without 12-tine, 12" diameter residue wheels, and treader wheels that provide superior flotation and follow ground irregularities.

Articulating clevis hitch

Optional on the 5900 and standard on the 5700 and 5670 planters, the articulating clevis hitch reduces lash and damage to the tractor drawbar and hitch pin.

5000 SERIES CLOSING WHEELS

Rubber "V"

HIGH TECH

PLANTER

The 5900 front fold planters, available in 24R30, 16R30, and 12R30 configurations, are equipped with the advanced 5000 Series electric drive row unit to match the unique demands of high productivity high-speed planting. A full array of features and options complete the 5900 planter to satisfy the unique requirements of your farm.

2-Year warranty on Blue Drive Planters

- Fully delivered electric planting with the 5000 Series row unit, Blue Drive electric drive, and two electric meter options
- Accurate planting at slow and fast speeds, from 3 to 12 mph, fully delivered with the True Speed high speed meter
- Simple planter operation with the Blue Vantage display controlling all transport, planting, fertilizer, camera, and data functions
- Maintain optimum and consistent seed depth with the quick-responding and durable True Depth hydraulic down force system
- The maintenance of three-fold marker arms is drastically reduced with pivots equipped with greaseless fiber bushings
- Adjust closing wheels for optimum seed-to-soil contact using Blue Vantage-controlled, air-adjustable closing wheels
- Reduced service and improved productivity from low-maintenance and durable features from the hitch to closing wheels
- Easily navigate rolling terrain with the 3-section front fold, high clearance frame featuring 42 degrees of wing flex
- Time-saving liquid fertilizer system with 400 to 750-gallon onboard capacity and optional factory plumbing for a nurse or saddle tanks
- Accurately apply fertilizer using row-by-row section control with the Blue Vantage display
- Low tractor hydraulic requirements – 2 SCVs and 25 GPM – with standard PTO variable displacement pump

Features & options*

5000 Series electric drive row unit

Blue Drive electric drive and Blue Vantage display

True Speed high speed or True Rate vacuum meters

True Depth hydraulic down force

Active hydraulic weight transfer

Yetter air-adjustable row cleaners

Air adjustable closing wheels

42 degrees of wing flex

One camera std; 3 add'l cameras optional

400 to 750 gallons of fertilizer

High transport clearance

Flip axle (24R)

Articulating clevis hitch

*Not all features are available with all configurations. Visit www.kinze.com/planters or your local dealer for details.

HIGH TECH

PLANTER

The 5700 front fold planters, available in 36R20, 24R30, and the 40' 24R20 configurations, are **equipped with the advanced 5000 Series electric drive row unit to match the unique demands of high productivity high-speed planting.** Outfitted with front-mounted tires, the 5700 is THE high-flotation solution for high-productivity, narrow-row, electric drive planting with large seed and fertilizer payloads.

2-Year warranty on Blue Drive Planters

- **Fully delivered electric planting** with the 5000-Series row unit, Blue Drive electric drive, and two electric drive meter options
- **Accurate planting at slow and fast speeds,** from 3 to 12 mph, fully delivered with the True Speed high speed meter
- **24-row 20" configuration** provides a large-frame, narrow-row solution for planting rolling terrain with less horsepower
- **Simple planter operation** with the Blue Vantage display controlling all transport, planting, fertilizer, camera, and data functions
- **Maintain optimum and consistent seed depth** with the quick-responding and durable True Depth hydraulic down force system
- **The maintenance of three-fold marker arms is drastically reduced** with pivots equipped with greaseless fiber bushings
- **Reduced service and improved productivity** from low-maintenance and durable features from the hitch to closing wheels
- **Adjust closing wheels for optimum seed-to-soil contact** using Blue Vantage-controlled, air-adjustable closing wheels
- **Easily navigate rolling terrain** with the 3-section front fold, high clearance frame featuring 30 degrees of wing flex
- **Time-saving liquid fertilizer system** with 500- or 750- gallon onboard capacity and optional factory plumbing for a nurse or saddle tanks
- **Accurately apply fertilizer** using row-by-row section control with the Blue Vantage display
- **Low tractor hydraulic requirements** – 2 SCVs and 25 GPM – with standard PTO variable displacement pump

Features & options*

5000 Series electric drive row unit

True Depth hydraulic down force

Air adjustable closing wheels

500 to 750 gallons of fertilizer

Blue Drive electric drive and Blue Vantage display

Active hydraulic weight transfer

30 degrees of wing flex

High transport clearance

True Speed high speed or True Rate vacuum meters

Yetter air-adjustable row cleaners

One camera std; 3 add'l cameras optional

Articulating clevis hitch

*Not all features are available with all configurations. Visit www.kinze.com/planters or your local dealer for details.

HIGH TECH PLANTER

The **5670 pivot fold** planters, available in 30' and 40' widths and four configurations, are the next generation of planters built on Kinze's proven push split row design. Whether used as a dedicated narrow-row planter or a multi-crop workhorse, it delivers increased productivity by utilizing the latest and best in technology and performance-boosting features.

2-Year warranty on Blue Drive Planters

- **Fully delivered electric planting** with 5000-Series pull and push row units, Blue Drive electric drive, electric drive meter options
- **Accurate planting at slow and fast speeds**, from 3 to 12 mph, fully delivered with the True Speed high speed meter
- **Automatic fertilizer tank leveling** that maintains equal levels in each tank and prevents overflowing of the downhill tank
- **Simple planter operation** with the Blue Vantage display controlling all transport, planting, fertilizer, camera, and data functions
- **Maintain optimum and consistent seed depth** with the quick-responding and durable True Depth hydraulic down force system
- **The maintenance of three-fold marker arms is drastically reduced** with pivots equipped with greaseless fiber bushings
- **Reduced service and improved productivity** from low-maintenance and durable features from the hitch to closing wheels
- **Adjust closing wheels for optimum seed-to-soil contact** using Blue Vantage-controlled, air-adjustable closing wheels
- **Easily navigate rolling terrain** with the 3-section front fold, high clearance frame featuring 30 degrees of wing flex
- **Time-saving liquid fertilizer system** with 300- or 600- gallon onboard capacity and optional factory plumbing for a nurse or saddle tanks
- **Accurately apply fertilizer** using row-by-row section control with the Blue Vantage display
- **Low tractor hydraulic requirements** – 2 SCVs and 25 GPM – with standard PTO variable displacement pump

Features & options*

5000 Series pull AND push row units

3005 SERIES

- **Hardened, replaceable large diameter double parallel arm bushings** have more wear area and are oil impregnated for double the wear life and to eliminate parallel arm replacement
- **Inner scraper material upgraded** for twice the wear life
- **Load equalizing gauge wheels** for uniform depth control, even in heavy residue or rugged planting conditions
- **Down force options** depending on configuration

3005 SERIES Row unit features

- 1 Reinforced heavy-duty shanks for maximum side load strength
- 2 10" of vertical travel handles changing field conditions
- 3 Double parallel arm bushings with larger wear areas for long life
- 4 Disc opener with double-row bearings for increased service life
- 5 Disc opener scraper material has double the service life

Optional spoked gauge wheels to better handle wet conditions.
Insecticide and granular chemical options available.

3005 Series

TRUE RATE VACUUM METER

Accurately plant a variety of seeds at a TRUE metered rate.

The **True Rate**® vacuum meter, with its wide selection of easy-to-change seed discs, can plant at speeds up to 8 mph*. The durable and easily serviceable design requires only one singulator for easy operation, optimum performance, and low cost of ownership.

Row Unit Attachments

Coulter mounted residue wheels

Clear a path for the opener blades with free-floating 12-tine, 12" diameter residue wheels. Treader wheels provide superior flotation and follow ground irregularities.

Spoked gauge wheels (optional)

Improved planting performance in wet conditions with easy-adjust, spoked gauge wheels equipped with long-life steel scrapers.

Granular chemical hoppers

Complete planting, fertilizer, AND insecticide application in one pass.

3605

CLASSIC  PLANTER

Outfitted with split row units, the 3605 is uniquely suited as a dedicated 15" soybean planter, along with the versatility to plant crops in 30" rows. Equipped with dry or liquid fertilizer, bulk fill or row unit hoppers, True Rate vacuum or mechanical meters, hydraulic or ground contact drive, and other options, the 3605 can be built as unique as the way you farm.

- Improved durability, longer wear life, and lower cost of ownership from 3005 Series row unit
- Exceptional seed handling capabilities with upgraded bulk fill entrainer — up to 11 different crops
- Plant at speeds up to 8 mph, as field conditions allow, with the True Rate vacuum meter
- Follow rolling terrain with a 3-section pivot fold frame with 14 degrees of wing flex
- Plant narrow row width crops with split row option
- Reduced pinch row compaction with 80 bushel bulk fill seed capacity with a hydraulic weight transfer system
- Fewer stops with an 80 bushel bulk fill hopper; scale optional
- Narrow transport and easy serviceability achieved with double frame, lift and pivot folding frame design
- Efficient fertilizer application with up to 600 gallons of liquid or 4,400 lbs. of dry fertilizer capacity

Features & options*

3005 Series Row Unit	Hydraulic weight transfer standard with bulk fill	Finger pick-up meter	Narrow transport
True Rate vacuum seed meter	Optional electric clutches	Brush meter 2.0	Articulating clevis hitch
Hydraulic drive	Split row	Liquid & dry fertilizer	
Ground contact drive		Serviceability	

*Not all features are available with all configurations. Visit www.kinze.com/planters or your local dealer for details.

HIGH TECH  **PLANTER**

Uniquely positioned as a small frame basic, or advanced technology planter for smaller farms or small fields, the Kinze 3505 pivot fold planter is simple to operate, high performing, and available with True Speed high speed meters. Performance optimized with other optional high tech features—Blue Vantage display, Blue Drive electric drive, and True Depth hydraulic down force—it accurately places your seed for increased productivity and profits at speeds up to 12 mph.

- True high performance and accurate split row planting with True Speed high speed or True Rate vacuum meters and Blue Drive electric drive
- Simple and easy to use Blue Vantage display with Map Sync shared field coverage data, and up to four cameras
- Consistent seed depth control from the optional True Depth hydraulic down force system
- Exceptional seed handling capabilities with upgraded bulk fill entrainer—up to 11 different crops
- Fewer stops with a 50 bushel bulk fill hopper; scale optional
- Narrow transport and easy serviceability achieved with double frame, lift and pivot folding frame design
- Improved durability, longer wear life, and lower cost of ownership from 3005 Series row unit
- Efficient fertilizer application with up to 300 gallons of liquid or 2,200 lbs. of dry fertilizer capacity
- 2-Year warranty on Blue Drive planters.

Serviceability

*Not all features are available with all configurations. Visit www.kinze.com/planters or your local dealer for details.

The 3205 wing fold planter is an economical solution for many operations—perfect for the farmer moving from a 6-row to a 12-row planter, or a growing operation in need of a second planter for smaller field sizes. Standard ground contact drive works seamlessly with True Rate vacuum meters for accurate seed placement. Wing fold frame provides center flex for terraces and rolling terrain; the proven design has minimal hydraulic requirements and low cost of ownership.

- Improved durability, longer wear life, and lower cost of ownership from 3005 Series row unit
- Plant up to 8 mph, as field conditions allow, with the True Rate vacuum meter
- Economical planter with minimal hydraulic requirements and low cost of ownership
- Efficient fertilizer application with 400 gallons of liquid fertilizer capacity
- Easily navigate terraces and rolling terrain with wing fold frame design incorporating 25 degrees of center flex

Model features*

3005 Series row unit

True Rate vacuum seed meter

Liquid fertilizer

Ground contact drive

Finger pick-up meter

Brush meter 2.0

Electric clutches

7" x 7" toolbar

25 degrees toolbar flex

*Not all features are available with all configurations. Visit www.kinze.com/planters or your local dealer for details.

The 3005 Kinze planter is an adaptable, small-frame hitch pin planter. Its bolt-together design can easily switch from standard to split rows and converts from 30" to 15" row spacing in minutes. When equipped with double frame, it can be outfitted with dry or liquid fertilizer along with optional split rows. Lower inputs and equipment costs up front allow you to customize and configure the 3005 planter to match your farm.

- Improved durability, longer wear life, and lower cost of ownership from 3005 Series row unit
- Economical planter with minimal hydraulic requirements and low cost of ownership
- Contact drive system with easy-access seed rate transmissions
- Optional double frame enables both split row and fertilizer options at the same time
- Up to 300 gallons liquid or 2,200 lbs. dry fertilizer capacity

Model features*

3005 Series row unit

Ground contact drive

Finger pick-up meter

Brush meter 2.0

Rigid frame

Self-leveling hitch

Split row

Liquid fertilizer

Dry fertilizer

*Not all features are available with all configurations. Visit www.kinze.com/planters or your local dealer for details.

PLANTING INNOVATIONS FROM FARMERS FOR FARMERS

From a humble 1,500-square-foot shop to a state-of-the-art 160-acre manufacturing campus, Kinze has remained laser-focused on developing innovative agricultural equipment by listening to what customers have to say. From Jon Kinzenbaw's first day in the welding shop in 1965, the needs of the customer have always been, and will continue to be, of the utmost importance to Kinze. The only question is what will be next?

The technology of planting is changing at an ever-increasing pace, and Kinze is constantly introducing new features and improvements to increase the precision, speed, and productivity of the most important job of the year. **To learn about the latest technology in planters and try it out for yourself, we invite you to be our guests at the Kinze factory and demonstration grounds. Contact us by filling out a form at [Kinze.com/visit](https://kinze.com/visit), or call (888) 599-6630 to schedule your visit.**
